

The most OE endorsements in North America

Robinair 1234yf machines are in more dealerships in North America than all other machines

Why AC1234-4-230?

Robinair North American 1234yf machines are engineered to SAE specs for 1234yf service and include key features to make service faster and easier.

Features	Definition
Automatic oil injection	Designed to SAE J2843 standards for R-1234yf refrigerant, with the added benefit of automatic oil injection.
230V power	Meets 230V, 50/60 Hz requirements.
Internal refrigerant ID	Requires refrigerant analyzer, which can detect purity level of R-1234yf prior to entering the A/C machine
Automatic internal tank fill	Double refrigerant capacity with internal and external tanks so you never run out of refrigerant mid-job. The machine automatically fills the internal tank
98.5% recovery	No other machine comes close to Robinair's 98.5% refrigerant recovery. More refrigerant removed means more that can be recycled and reused, saving time and money.
